THE GATORZ DIFFERENCE

The Gatorz brand emerged in 1989 under one founding principle: create something as bold and unique as the people who would wear them—the elite. That inspired a new type of eyewear designed and engineered for the trifecta of fit, form, and function, and proudly made in the USA.

Differentiated by an ultra-durable aluminum frame, Gatorz sunglasses maintain a reputation for exceptional performance in any situation, from the extreme to the everyday. Whether you're jumping out of a plane, storming a building, fighting fires, down range, or just downtown, our sunglasses are up to the challenge.

QUALITY AND MATERIALS

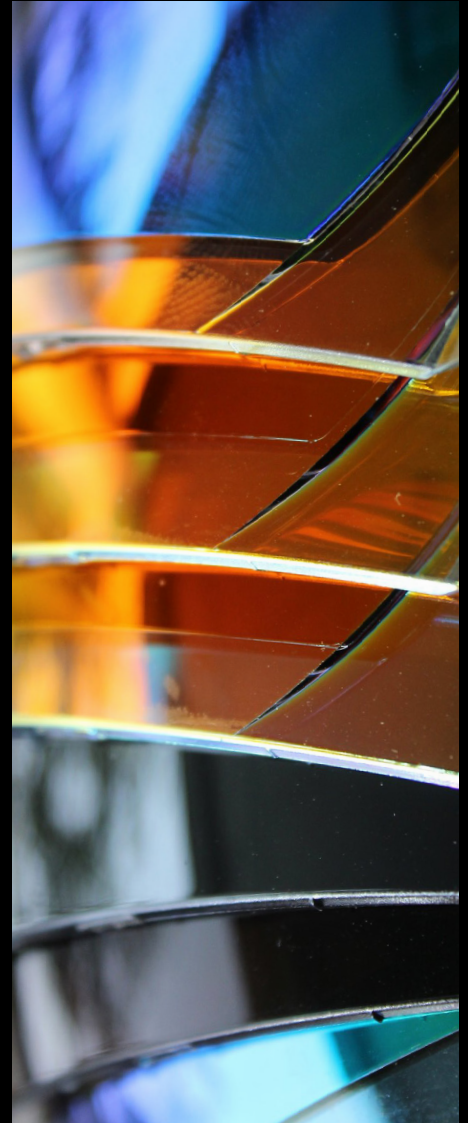

THE FRAME

- Milled from the highest quality, military grade aluminum
- Hand crafted in the USA
- Stainless steel, plastic coated screws that resist backing out
- Stainless steel, nickel plated, dual sided 5 barrel hinges, with a 4 rivet system

THE NOSE PIECE

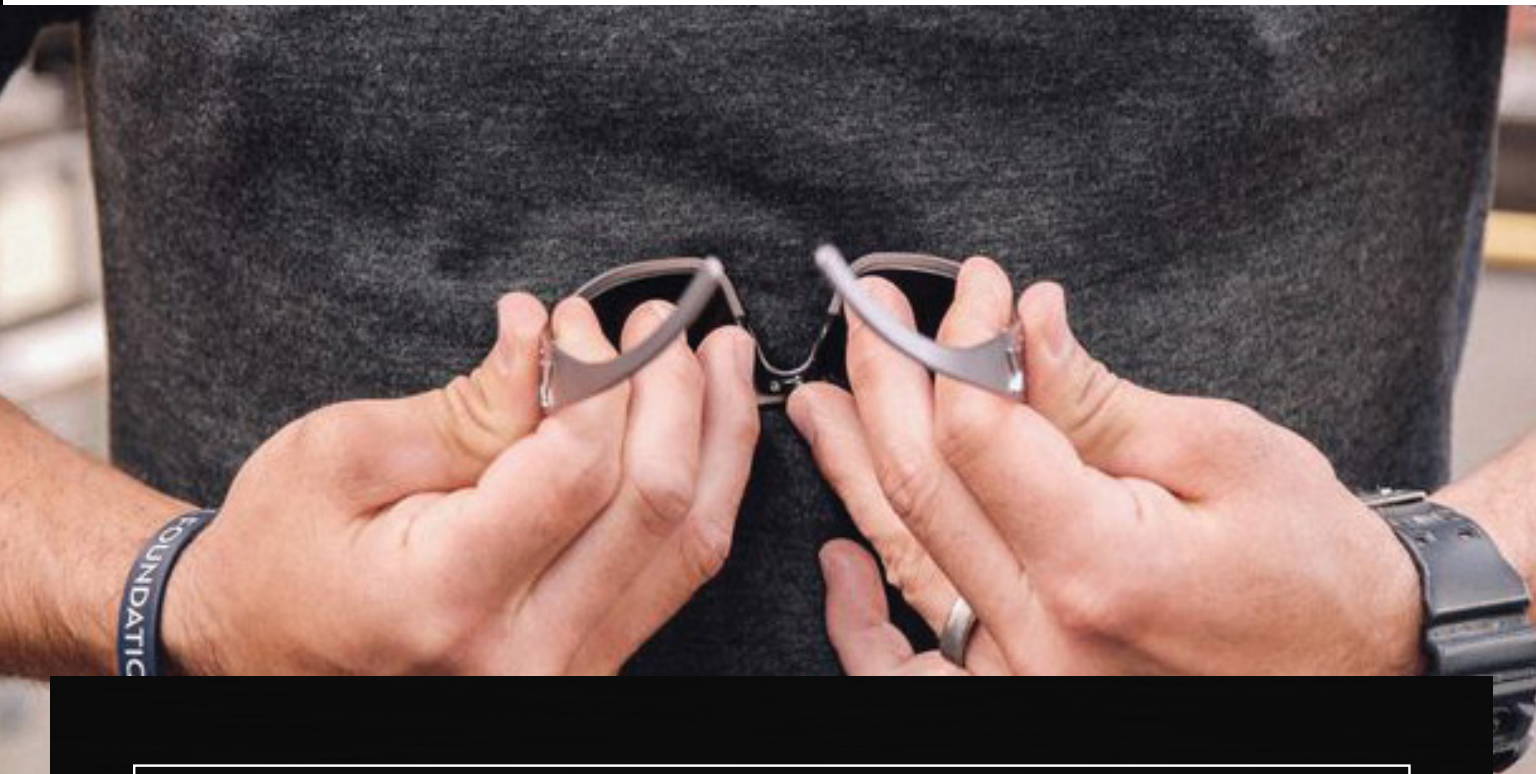

- Each nosepiece features a silicone coated, stainless steel piece to allow for ultimate comfort and adjustability.
- Mounted via stainless steel screws, the nosepiece is sure to stay in place.

THE LENS

- The durable, yet flexible military grade aluminum provides the optimum balance to hold the lens in place during activities.
- The impact resistant, polycarbonate lenses block 100% of UVA and UVB radiation
- Available in polarized and non-polarized, and the variety of lens options ensure clear vision for any activity you choose

ADJUSTABILITY

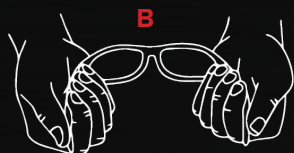

INSTRUCTIONS FOR PROPER FIT

The Gatorz glasses you have just purchased have been carefully manufactured by hand to ensure quality. Due to the fact that Gatorz are heat treated for strength and durability, they may vary in fit. However, they are designed to fit any face because of the adjustable frame and nose piece.

Frame Adjustment (Figure A)

If your Gatorz are too tight, the primary adjustment is made in the front frame. This is done by holding the frame and the nose bridge and carefully flexing the frame outward. Work the frame slowly for a perfect fit. Bending the frame too hard or too fast can lead to lens distortion or the lens popping out of the tension mounted frame.

Temple Adjustment (Figure B)

A second adjustment can be made to the narrow end of the temples. The temple pieces will have less flexibility. This adjustment relieves any pressure from the back of your ears and should be made only after adjusting the center frame.

Nosepiece Adjustment (Figure C)

The nosepiece is molded with a stainless steel inlay, therefore, the nosepiece can be bent to loosen or tighten the fit. It can also be pulled out to keep the frame away from your face.

LENS TECHNOLOGY

TRU-RAY OPTICS

Manufactured using a proprietary advanced injection molding process, with high optical grade polycarbonate materials, every pair of Gatorz lenses exceed global sunglass standards.

Benchmarked for performance, TruRay optics represent years of research and development on lens color tints and light transmissions, which are carefully formulated by our team of product specialists to optimize visual performance for various activities, by carefully adjusting the color spectral wavelengths designed to give the most high definition vision.

COATINGS

Multi-layer Coatings for Enhanced Performance Include:

- Highly durable scratch resistant coatings that make Gatorz lenses stronger and more scratch resistant.
- Hydrophobic coating that repels water, sweat, and liquids off the surface of the lens, allowing for easy cleaning and maintenance
- Oleo-phobic coating that repels grease, oil, and dirt for extreme activities, ensuring that your vision is not affected by the environment
- Anti-fog coating that prevents the inside of the lens from fogging, providing you with unrestricted vision under any condition.

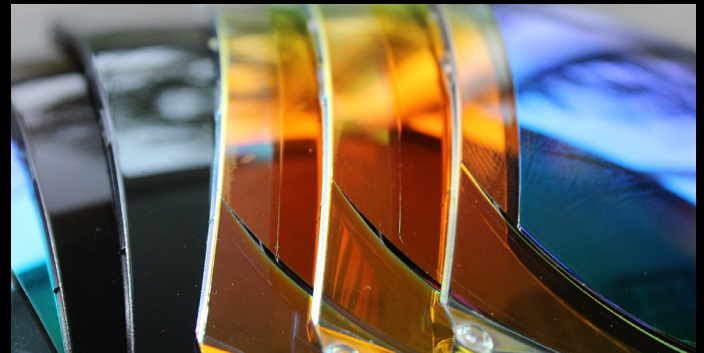

POLARIZATION

Our polarized lens technology allows for maximum visual clarity by eliminating harmful and distracting glare. By utilizing the latest in film technology and fusing the polarization film within the lens, our polarization will never wear off like lenses with an exterior coating.

IMPACT RESISTANT

Unlike traditional sunglass lenses, Gatorz are made from high quality, ballistic grade polycarbonate, which gives them unparalleled resistance. Our glasses exceed global impact resistance standards.

UV PROTECTION

Our lenses provide maximum protection for your eyes by blocking out harmful UV rays. Unlike lenses with a UV coating, ours are built with the technology inside the lens itself, ensuring consistent protection over time.

LENS COLORS

SMOKE

Heightens true color perception, minimizes glare (especially on water), reduces eye fatigue.

USES: Cycling, driving, racing, fishing, golf, everyday use, outdoor sports, skiing, tennis

VLT: 12%

YELLOW

Heightens contrast in overcast, hazy, low-light conditions outdoors or for indoor sports. Filters blue light for sharper focus.

USES: Cycling, hunting, shooting, skiing, snowboarding, snowmobiling, indoor basketball, handball, racquetball, tennis, video gaming

VLT: 88%

ROSE

Heightens contrast in partly cloudy and sunny conditions.

USES: Cycling, fishing, hunting, shooting, skiing, snowboarding, snowmobiling, water sports.

VLT: 16%

BROWN

Blocks high amounts of blue light to heighten contrast and visual acuity. Particularly useful to improve contrast on grass and against blue skies.

USES: Baseball, fishing (especially in waters with grassy bottoms), golf, hunting, skiing, water sports

VLT: 14%

EMERALD

Heightens contrast for low-light conditions. Offers even color perception. Reduces glare and brightens shadows.

USES: Cycling, fishing, golf, outdoor sports, skiing, tennis

VLT: 15%

CLEAR

Offers the impact resistant protection of Gatorz sunglasses, without any visual enhancements.

USES: Shooting, night time fishing, or outdoor sports.

VLT: 92%

VLT=Visible Light Transmission

ANSI Z87+

Our ANSI Z87+ line meets and exceeds ANSI Z87.1-2015 standards. This specification pledges ultimate optical clarity and impact resistance, while providing you with the same familiar durability, comfort, and adjustability. The fit and function of the “Z” Line allows you to execute all operations in your favorite classic styles with the protection you need.

INFERNO® LENS

Our Gatorz Inferno Photochromic lens series feature state of the art fusion technology that results in superior transitional performance. When used indoors, the Inferno lenses provide crystal clear vision and superior optics. When exposed to the sun's UV rays, the tint of the lens will automatically darken, reducing light transmission and provide the user with an all-encompassing utility lens suitable for any kind of activity.

OPZ LENS

Our Gatorz OPz (Optimized Polarized) lenses create the perfect balance of glare elimination and visual clarity with an unrestricted view for all types of activities. Simply put, they're polarized enough to filter the light without interrupting the ability to view digital screens, ice, water, oil, and other objects normally blocked by polarized lenses. Created through our proprietary advanced injection molding process, combined with our advanced film fusion technology, these lenses are the only of their kind, and create the most “complete” lens on the market.

MAGNUM

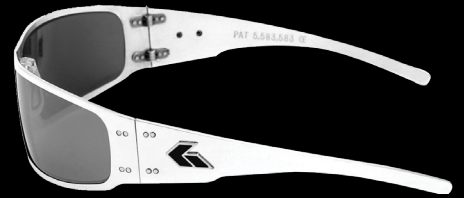

MAGNUM

Magnums are our #1 selling sunglasses which feature a large size, wrap style fit. The lightweight, durable aluminum frame is adjustable, providing the ultimate comfort and fit. The preferred style of many Military and Law Enforcement personnel, this frame offers a great look for athletes, skydivers, outdoor enthusiasts, and bikers as well. Our bestselling Magnum looks great on any face shape. We also offer THE MAGNUM 2.0 (Asian Fit) in select SKUs, which is based on our classic Magnum frame with small adjustments making the front of the frame slightly wider, and a longer nosepiece to best fit Asian facial features.

WRAPTOR

WRAPTOR

Features a medium size, wrap style fit. With a tighter wrap than the Magnum, this style is popular with skydivers, bikers, runners, and anyone looking for a close fitting, comfortable frame. Our second most popular frame, the Wraptor looks great on any face shape, especially those looking for a smaller fit.

BOXSTER

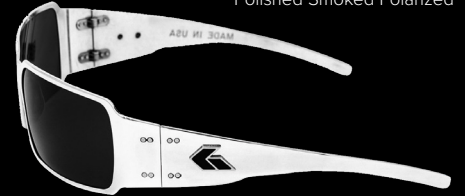

BOXSTER

The Boxster features a large size lens on a wider set frame. With more square shaped features, this frame offers a stylish yet tough look. The Boxster provides great coverage for those with a larger face shape, and ladies who are used to bigger sunglasses.
